PROFESSIONAL SUMMARY

Business development and growth leader combining consultative sales, hands-on technology delivery, and strategic relationships. Builds customer and partner networks, develops opportunities, and connects commercial strategy with the systems needed to deliver. Experience spans enterprise accounts, national field operations, marketing, and AI-enabled business software.

PROFESSIONAL EXPERIENCE

Atlas-Beren Systems | Founder & Chief Systems Architect

Newton, KS | Jan 2026 - Present

- Founded a business systems firm combining consultative selling, digital marketing, custom software, and AI automation. Lead prospecting, client discovery, proposals, pricing, and customer relationships.
- Deliver websites, digital infrastructure, and custom business systems for logistics, service, and healthcare clients; manage scope, delivery, and ongoing relationships.
- Designed and built **Atlas-Beren Console**, connecting prospect discovery, CRM, estimating, projects, finance, scheduling, inventory, and field operations.

Kansas Electric, Inc. | Business Development Manager

Newton, KS | Oct 2024 - Dec 2025

- Identified and presented **$100M+ in prospective project opportunities** over 12 months through commercial and industrial contractor, owner, partner, and customer relationships.
- **Helped win $2M+ in awarded work in the first 60 days** through targeted prospecting, opportunity qualification, and competitive proposals.
- Led CRM, pipeline management, forecasting, marketing, website development, and advertising to strengthen positioning and build a repeatable sales process.
- Built AI-assisted estimating tools to address bid-capacity constraints; coordinated scoping, bid prioritization, and sales-to-project handoffs.

Vale Field Services | Head of Strategic Operations

Remote / U.S. & Canada | Jul 2019 - Oct 2024

- Joined as employee #2 and led sales, customer acquisition, pricing, and operations as the company grew from inception to **approximately $4M in annual revenue within 18 months**.
- Built customer, manufacturer, and subcontractor relationships for national programs serving Taco Bell, Walgreens, CKE Restaurants, Scooter's Coffee, and LongHorn Steakhouse.
- Directed **up to 10 field installation teams nightly** across the U.S. and Canada; standardized scheduling, reporting, quality assurance, and customer handoffs.

Quality Solutions, Inc. | Construction Project Manager

Colwich, KS | 2016 - 2019

- Managed multi-site facilities maintenance, retail refresh, and rebrand projects across the U.S. and Canada, coordinating customers, trade partners, and subcontractors.
- Owned estimating, sourcing, budgets, scheduling, quality control, and invoicing from initial scope through closeout.

SELECTED SYSTEMS & TECHNOLOGY

Atlas-Beren Console | Integrated Growth & Operations Platform

- Built a multi-tenant platform with **Next.js, React, TypeScript, and Supabase/PostgreSQL**, linking sales activity with estimating, project delivery, finance, inventory, scheduling, and field operations.
- Developed prospect discovery, contact enrichment, configurable outreach, and reply-handling workflows to support systematic prospecting and customer follow-up.
- Added a permission-aware AI assistant, source-linked answers, bid-document review, and estimating workflows to turn business data and documents into actionable information.
- Implemented organization-based permissions, tenant isolation, approval queues, audit trails, and persisted AI-agent runs; built offline field workflows with queued photos and manager review.

Kansas Electric | AI-Assisted Estimating & Sales Operations

- Built bid-document review and takeoff tools to address an estimating bottleneck: only **approximately 3.6% of incoming opportunities** were being bid.
- Reduced a representative **20-hour estimating workflow to approximately 10-15 minutes**, helping the team prepare estimates faster and pursue more qualified opportunities.
- Developed CRM, field-reporting, and forecasting tools to improve pipeline visibility, internal coordination, and project handoffs.

Vale Field Services | National Rollout Operating Model

- Standardized onboarding, training, QA, reporting, and installation processes for multi-location technology programs, reducing completion times **approximately 15%** and increasing team productivity **approximately 20%**.
- Coordinated enterprise stakeholders, manufacturers, subcontractors, and field leaders to turn pilots and complex scopes into repeatable delivery programs.
