

ERIC MARTIN

REVENUE OPERATIONS & TECHNICAL SYSTEMS LEADER

Newton, KS | (316) 250-8333 | ericm93.2023@outlook.com | eric-portfolio-five.vercel.app

Revenue operations and technical systems leader experienced in building growth, delivery, and customer operations across industrial services, distributed field programs, and software. Combines commercial ownership with hands-on systems architecture to turn ambiguous workflows into scalable processes, dashboards, automations, and production applications. Track record includes approximately \$2M in new work closed within 60 days, \$100M+ in presented opportunities, and helping scale a services company to roughly \$4M in annual revenue.

CORE CAPABILITIES

Revenue Operations | Strategic Operations | Business Development | GTM Systems | Pipeline & Forecasting | Customer Success | Implementation & Rollout | Process Architecture | Cross-Functional Leadership | Field Operations | Vendor Management | Product Operations | AI-Enabled Automation | Executive Reporting

PROFESSIONAL EXPERIENCE

Founder & Principal Systems Architect | Atlas-Beren Systems

Newton, KS / Remote

Jan 2026 - Present

- Founded an AI systems consultancy for trade and field-service businesses and built its flagship product, a multi-tenant operations platform that combines prospect acquisition, client workspaces, specialized business agents, and approval-gated execution.
- Architected the platform in Next.js 16, React 19, TypeScript, and Supabase Postgres with org-scoped RBAC, row-level security, source-agnostic data ingestion, normalized schemas, and 30+ database migrations.
- Designed an extensible agent execution framework with readiness guards, executor registration, persistent runs, approval queues, scheduled Vercel Cron jobs, and unified LLM access through Vercel AI Gateway with Google Vertex AI fallback.
- Built a prospecting and CRM engine using Google Places, ICP scoring, chain filtering, website evidence extraction, Hunter.io discovery, AI qualification, personalized outreach drafts, deal tracking, saved views, and weekly automated discovery.
- Delivered six headline agents across finance, dispatch, reviews, advertising, prospecting, and business health, producing confidence-scored findings, cross-agent KPIs, action drafts, and unified triage workflows; validated core logic with 200+ unit tests.

Director, Business Development & Technical Systems | Kansas Electric, Inc.

Newton, KS

Oct 2024 - Dec 2025

- Closed approximately \$2M in new work within the first 60 days and built a commercial motion tied to \$100M+ in 2025 presented opportunities and a forward pipeline exceeding \$200M over the following 24 months.
- Designed and shipped connected systems across CRM, estimating, field reporting, scheduling, forecasting, customer intelligence, labor planning, and leadership visibility, replacing scattered sheets, inboxes, and ad hoc handoffs.
- Rebuilt the company website, service positioning, lead capture, and account-research workflows to improve market credibility and create a cleaner path from initial interest to accountable follow-up.
- Standardized pipeline reviews, opportunity refreshes, forecasting, activity capture, and executive reporting so leadership could see commercial momentum, delivery readiness, and operational risk in one operating picture.
- Developed offline-capable field and estimating tools using PWA patterns, structured data capture, AI parsing and summarization, OCR fallback, confidence scoring, and export-ready outputs.

PROFESSIONAL EXPERIENCE

Head of Strategic Operations | Vale Field Services

Remote

Jul 2019 - Oct 2024

- Helped scale the company from startup stage to approximately \$4M in annual revenue by building the processes, vendor networks, training, QA, and delivery infrastructure required for repeatable national growth.
- Owned operating frameworks across customer onboarding, project planning, documentation, dispatch, subcontractor management, field execution, issue resolution, invoicing readiness, and post-work quality follow-through.
- Directed distributed teams and vendors through complex multi-site technology and facilities programs for national restaurant, retail, and commercial customers, balancing schedule, quality, cost, and customer experience.
- Served as a strategic pre-deployment partner by identifying feasibility constraints, site-readiness gaps, installation risks, support requirements, and best-fit execution models before rollout.
- Created SOPs, escalation paths, training materials, performance standards, and operating cadences that improved consistency across geographically distributed work.

SELECTED TECHNICAL & PRODUCT WORK

Eden MMO Engineering | *Production software and live operations*

- Built and supported C#.NET, JavaScript, and PostgreSQL systems for a live MMO community of approximately 30,000 players, owning server-side feature delivery, data modeling, operational tooling, and release risk.
- Handled incident response, hotfixes, performance improvements, safe migrations, support and moderation tooling, logging, and abuse mitigation in a live production environment.

TECHNOLOGY & TOOLS

Engineering: JavaScript/TypeScript, React, Next.js, Node.js, Python, C#.NET, SQL/PostgreSQL, Supabase, row-level security, REST/API design, data normalization/ETL, React Query, Zod, Vitest, Playwright, GitHub CI/CD, Vercel, Vercel AI SDK/Gateway, Google Cloud/Vertex AI, MCP integrations, OCR/vision workflows

Business & Delivery: Salesforce, HubSpot, Gainsight, Jira, Asana, Monday.com, Smartsheet, Google Workspace, Microsoft Excel, customer onboarding, implementation planning, vendor coordination, forecasting, dashboarding, and executive reporting
